

INTER-OFFICE COMMUNICATION

DATE : July 14,2026
TO : HUMAN RESOURCES DEPARTMENT (HRD)
FROM : MIS
SUBJECT : ADRIAN VENTURA REGULARIZATION

I would like to respectfully recommend the regularization of **Mr. Adrian Ventura**, Junior Programmer, based on his satisfactory performance, technical competence, and valuable contributions to the MIS Department during his probationary period.

Throughout his employment, Mr. Ventura has consistently demonstrated dedication, initiative, and professionalism in carrying out his responsibilities. He has effectively developed, maintained, and supported various information systems that contribute to the company's operational efficiency and digital transformation initiatives. He has consistently completed assigned tasks within the required timelines and has demonstrated the ability to work independently while collaborating effectively with end-users and other departments.

In view of his performance and the expanding scope of his responsibilities, I also recommend a corresponding **salary adjustment PHP 10,000**. This recommendation recognizes his technical expertise, commitment, and significant contributions to the department. Providing a competitive salary will help retain a highly capable employee, acknowledge his performance, and motivate him to continue delivering excellent results as he assumes more strategic system development responsibilities.

Mr. Ventura has already made significant contributions through the successful completion of the following projects:

Completed Projects

1. **IT Helpdesk System** – The IT Helpdesk Ticketing System is designed to improve the management, monitoring, and resolution of IT-related concerns by providing a centralized platform for users to report incidents, request services, and track the status of their concerns. It promotes transparency, faster response times, proper documentation, and better service delivery from the MIS Department.
2. **Lubricant System** – To provide a centralized system for recording lubricant issuance, tracking oil consumption, monitoring oil loss, and identifying abnormal usage or possible leakage/wastage

He is also expected to play a key role in the development and implementation of the following critical MIS upcoming project:

Future Project.

1. **Mining Production Dashboard System** – Development of a centralized dashboard to monitor mining production data, key performance indicators (KPIs), and management reports to support timely and informed management decision-making.
2. **OTP System** – Implementation of an OTP-based authentication and approval process to strengthen system security.
3. **COMREL System Enhancement and Maintenance** – Continuous enhancement, maintenance, and technical support of the Community Relations Management System to improve operational efficiency, system functionality, and user experience.
4. **Hospital Patient Discharge System** – Development and implementation of an automated patient discharge process to streamline hospital operations, improve patient record management, and generate accurate operational reports.

These projects are essential to the company's ongoing digital transformation initiatives and require competent technical personnel to ensure their successful implementation, reliability, and long-term sustainability. Based on Mr. Ventura's proven performance, technical competence, dedication, and potential for continued growth, I am confident that he will continue to make significant contribution the organization.

In view of the foregoing, I respectfully recommend the **regularization of Mr. Adrian Ventura** as Junior Programmer, together with an appropriate **salary adjustment PHP (10,000)**, subject to Management's approval.

Your favorable consideration of this recommendation will be highly appreciated.

Respectfully submitted,

Alfred F. Villarico
